

VIVEK SAHU

mail@viveksahu.com | viveksahu.com | github.com/vivek-src | linkedin.com/in/vivek-src

Education

B.Tech — Computer Science & Engineering 2023 – 2027
Chhattisgarh Swami Vivekanand Technical University (CSVТУ) | CGPA: 7.8 (ongoing)

Technical Skills

Languages	TypeScript, JavaScript, Python, Java, C++, SQL
Frontend	React, Next.js, Tailwind CSS, shadcn/ui, Vite
Backend	Node.js, Express, REST, WebSockets, gRPC, JWT, Zod, Kafka
Databases	PostgreSQL, MySQL, MongoDB, Redis, Prisma ORM
Cloud / DevOps	AWS, Docker, Kubernetes, Cloudflare, Nginx, Linux, CI/CD

Experience

Network Engineer (Internship) — BSNL TIP Partner, Raipur Sep 2024 – May 2025

- Led technical operations managing the installation, configuration, and maintenance of 4 OLT sites serving 400+ customers.
- Supported network infrastructure for two IPL matches at SVNS Cricket Stadium, managing firewall load balancing, dedicated ILL connectivity, and stadium-wide Wi-Fi.
- Monitored network latency and uptime against SLAs; collaborated with BSNL engineers on escalations and rapid service restoration.

Web Development Intern — Bakshi Media, Remote, Sydney Australia Feb 2024 – Jul 2024

- Contributed to website design proposals and supported revamp projects to enhance overall design and user experience.
- Planned and designed social media graphics while creating technical proposals for regulatory and client approvals.

Projects

Exchange-Lab — TypeScript, Node.js, TimescaleDB, Redis, WebSockets, Next.js Mar 2026 – present

- Built a high-performance in-memory order-matching engine replicating core financial market mechanics with deterministic price-time priority.
- Decoupled the matching engine from the client layer via Redis pub/sub, enabling horizontal scaling of the WebSocket tier independently of order processing.

Gym Buddy — Next.js, TypeScript, Docker, Tailwind, Cloudflare R2

- Architected a responsive web application for structured workout splits and health metrics using server-side rendering for fast load times.
- Containerized deployment with Docker and integrated Cloudflare Object Storage (R2) and CDN to efficiently deliver image assets with low latency.

Personal Portfolio & Technical Blog — Next.js, TypeScript, MDX, Cloudflare Pages

- Developed a personal platform to feature software engineering projects, cloud infrastructure experience, and technical articles on emerging technologies.

Certifications

- **Amazon Web Services (AWS):** Cloud Practitioner Essentials, Cloud Computing Essentials, Intro to Generative AI
- **The Linux Foundation:** Introduction to Linux (LFS101), Introduction to Node.js (LFW111)
